

## Ross Duncan announced as BC AHSN's first Learning Health Systems Data Analyst

Vancouver, BC, Canada (February 7<sup>th</sup>, 2020) The British Columbia Academic Health Science Network (BC AHSN) is pleased to announce that Ross Duncan, MSc is the organization's Learning Health Systems Analyst, effective February 3<sup>rd</sup>, 2020.

Ross will support the development and implementation of analytic and other technical research infrastructure at the organization. His role is shared with the BC Emergency Medicine Network ([www.bcemn.ca](http://www.bcemn.ca)), an example of a Learning Health System working to support and improve emergency care in BC.

Ross has an academic background in economics, statistics, and health services research. He has worked previously as a researcher at the BC Cancer Research Centre and the Collaboration for Outcomes Research and Evaluation (CORE), and as a consultant for quality improvement initiatives at Alberta Health Services.

The British Columbia Academic Health Science Network (BC AHSN)'s role is to advance learning health systems in BC and to enable innovations within the system that make the best use of provincial assets, resources and expertise. BC AHSN's operational units include the BC SUPPORT Unit, Clinical Trials BC and Research Ethics BC.
